## Experience

**Data Analyst II**, Wanderu, Boston, MA May 2019 - March 20, 2020

- Primary data analyst at leading US bus & train ticket aggregator with substantial weekly sales: \$2M+ gross, 50k+ seats
- Built out the company's BI tool (Looker) from near scratch with focus on web traffic and conversion
- Lived in variety of internal datasets: clickstream events (10M rows/day), inventory cache (~50M rows/day), ticket sales and error logs
- Delivered and explained data insights directly to executives on a daily basis
- Large remote presence at company including my direct manager and personally WFH once weekly

**Data Analyst**, LevelUp (a Grubhub company) Boston MA September 2017 - May 2019

- Built and maintained client-facing embedded dashboards for 150+ whitelabel app clients including sweetgreen, dig inn, potbelly
- Collaborated with data engineer to develop new analytical aggregate tables which dramatically improved dashboard load times
- Worked closely with marketing and data team at Sweetgreen as their dedicated data resource including an on-site in LA
- Wrote many complex SQL queries on a daily basis

**Front-End Development Intern**, The ADK Group, Boston, MA Summers 2015, 2016

- Full time front end developer at a 25-employee app development shop
- Translated design files into responsive HTML/CSS/jQuery websites
- Completed a handful of personal web projects to maintain skills and experiment with the full stack (links available on github!)
